

Tiranë, 24.06.2023

## PRESS RELEASE

The Balkan Youth Mathematical Olympiad, JBMO 2023 is brought to Albania by the Albanian Mathematical Association, which has the privilege of organizing this event for the second time in its 27th edition. Students from 19 Balkan countries and beyond will participate in this event. The Olympiad program will last from June 23 to 28 and the competition will take place at Sami Frashëri high school. Participants from different countries will challenge their knowledge in the fields of mathematics and logic.

This is an important event to promote young talents in the field of mathematics and to ignite the interest and skills students in the field of mathematics and science in general. Such events hold special value as they not only emphasize the importance of science, but also unite young people from different cultures, fostering a global, tolerant and more beautiful mindset for society. Additionally, this activity is a good promotion of young people who work with diligence, passion and intelligence to become exemplary models of future citizens and professionals.

This activity, which highlights the importance of mathematics in Albania, the Balkans and beyond, emphasizes our country's commitment to nurturing intellectual and scientific ability across generations. The activity is organized by the Albanian Mathematical Association (AMA) in collaboration with the Ministry of Education and Sports of Albania (MAS) and the Mathematics Society for Southeast Europe (MASSEE) with the support of Credins Bank and other partner companies and organizations.
